

## Senior Technical Writer

PDF is seeking a senior technical writer to work on a minimum six-month contract project, documenting advanced semiconductor enterprise software tools and also to work on a documentation platform migration project. Successful candidates need to be able to work with development and application engineers to learn complex processes and procedures and to fully document those topics for our customers.

Requirements include: minimum five years' experience as a senior technical writer working with a diverse engineering staff on complex software and/or hardware tools; extensive unstructured Adobe FrameMaker experience.

Highly-preferred documentation software experience: Adobe RoboHelp, Madcap Flare, Help & Manual or similar topic-based multi-output documentation/Help authoring platforms; basic-to-advanced Adobe Acrobat Professional publishing skills. Helpful graphics tools experience: Adobe Photoshop; Adobe Illustrator; TechSmith Snagit; Axialis IconWorkshop.

Looking for candidates who can commit to a six-month minimum full-time engagement and who are open to contract length extensions and possible permanent employment.

Bachelor's degree in Technical writing or English or equivalent experience required.

Candidates with electrical engineering or computer science degrees and with tech writing experience are also encouraged to apply.
